Effio-P Series Outdoor Analog Cameras

1/3-inch, CCD, 700TVL, WDR, DSS, AGC, AWB, 3D DNR, BLC, OSD, Day/Night, Water-Resistance, Bullet Case

Product Features

- 700 TV Lines: High Sensitivity (0 Lux with IR on)
- 120dB Wide Dynamic Range (WDR)
- Optical Day/Night Function to Switch to Day or Night Mode depending on the light level
- Sony 1/3-inch Exview HDD CCD II 960H
- Sony Digital Signal Processor (DSP), Effio-P
- IR Compensation
- Power (12 DC)
- Digital Slow Shutter (DSS)
- Digital Zoom

- 3D Digital Noise Reduction (3D DNR)
- IR Illumination, distance depends on model, refer chart below
- Adjust OSD menu by controller via BNC cable
- Environmental Capability with a standard Operating Temperature
- Privacy Zones
- Motion Detection
- Alarm Output

Product Details

The RYD Outdoor Effio-P Series is a premium grade, wide range integrated, IR, bullet, CCD camera. It uses a group of integrated infrared LEDs to deliver high quality pictures, even at night with zero illumination. Its WDR and day/night technology provides outstanding performance over a wide range of low-light conditions, as well as extreme high backlight conditions. The camera uses a removable infrared (IR) cut filter to switch between color and black-white modes as environmental lighting conditions change, and when the need for infrared sensitivity is realized

The RYD Outdoor Effio-P Series is a high resolution digital camera with 700 TVL of resolution, and a minimum of 0.1 lux illumination in color mode. In low-light conditions, the camera can use Digital Slow Shutter (DSS) to produce 0.03 lux sensitivity.

The RYD **Outdoor Effio-P Series** is equipped with high performance IR compensation. The camera can be set manually to adjust IR illumination levels, enabling customers to change the levels of luminance and contrast according to the shooting environment. This function reduces the blooming effect and delivers clear images when objects get closer to the camera. With IR supplemental lighting, the RYD Outdoor Effio-P Series operates under zero lux (monochrome mode). Camera features include autosensing power (12 VDC with internal synchronization) and automatic gain control (AGC)

The RYD **Outdoor Effio-P Series** is equipped with high performance adaptive illumination IR LEDs. Supported by built-in WDR technology, the camera can detect the IR illumination level and adjust it automatically. This again reduces the blooming effect and outputs clear images when an object gets increasingly closer to the camera

The RYD Outdoor Effio-P Series includes Automatic White Balance (AWB) for difficult lighting situations, Digital Noise Reduction (DNR) that minimizes environment noise levels to produce clear image quality, and Backlight Compensation (BLC) that adjusts the picture to prevent objects from appearing dark due to a strong backlight. These fine-tuning features are easily configured using the convenient multi languages On-Screen Display (OSD) menu. Use this menu to select a specific profile, to customize and save camera settings for the specific application, and trigger alarm output functions

The RYD Outdoor Effio-P Series has an wide range operating temperature (-20° to 50°C)

The RYD Outdoor Effio-P Series has built in analytical capabilities including privacy zones, motion detection, that adds to its functionality and makes it suitable for most applications

Typical applications for the RYD Outdoor Effio-P Series includes longer-range Outdoor boundary surveillance that has zero light at night, and a need to supplement the scene with IR light. The true day/night functionality provides the best images in low-light and IR light applications, by using a black-white mode function
